SORBENTS

Whether your spill is large or small, ACME sorbents and spill kits do the job right, the first time. ACME sorbents are produced in different sizes, thicknesses, and composition. Ideal for any spill, we provide socks, pillows, cotton pads, rolls, and industrial rugs to help with quick and complete cleanup. Sorbents from ACME will help lessen a spill's impact on your productivity and profitability.

Oil-Only sorbents pick up 25 times the fibers' weight in petroleum-based liquids, but never absorb water.

Aggressive/HazMat sorbents are very effective to clean up chemical spills from water-based fluids to aggressive acids, and absorbs 25 times its weight in all liquids.

Universal sorbent socks pick up oil, water, coolants and solvents, and are made of recycled BTU-rich fibers for multiple disposal options. Industrial rugs provide an excellent non-slip surface for work areas, and can absorb 10-12 times their weight in water, oil or chemicals.

Biodegradable sorbents are made from all-natural, non-toxic and recycled fibers, and perfect for spills where biodegradable sorbents are required.

Particulate sorbent, MiracleSorb, is organic and made from 100% Louisiana sugarcane bagasse—a byproduct of the sugarcane milling process. MiracleSorb can be used on water, soil or solid surfaces, absorbs up to 10 times its weight, and is available in original, nitrogen-enriched, and enhanced with nitrogen and oil-eating microbes.

ACME also offers viscous snares/pom-poms, drum liners, poly sheeting, and poly bags.

SPILL KITS

ACME spill kits come in zippered bags or resealable containers/ drums, and hold all necessary items to enable a quick response to any type of spill. Standard spill kit items include:

- Container
- Gloves
- Poly Disposal bags
- Clay Socks
- Sorbent Pads
- Particulate Sorbent (except for 5-Gallon kit)

ACME Oil-Only and Universal/HazMat spill kits can also be custom-designed to meet your specific needs.
