ACMEboom.com

ACME Cranberry Boom is manufactured to help farmers during harvest season collect their cranberries in an fast and efficient manner. With multiple designs and a full range of customization available, ACME's Cranberry Boom can help you make the most out of your harvest season! Learn more about the different types we have below, or ask about getting a price for a custom build.

CRANBERRY CORRAL:

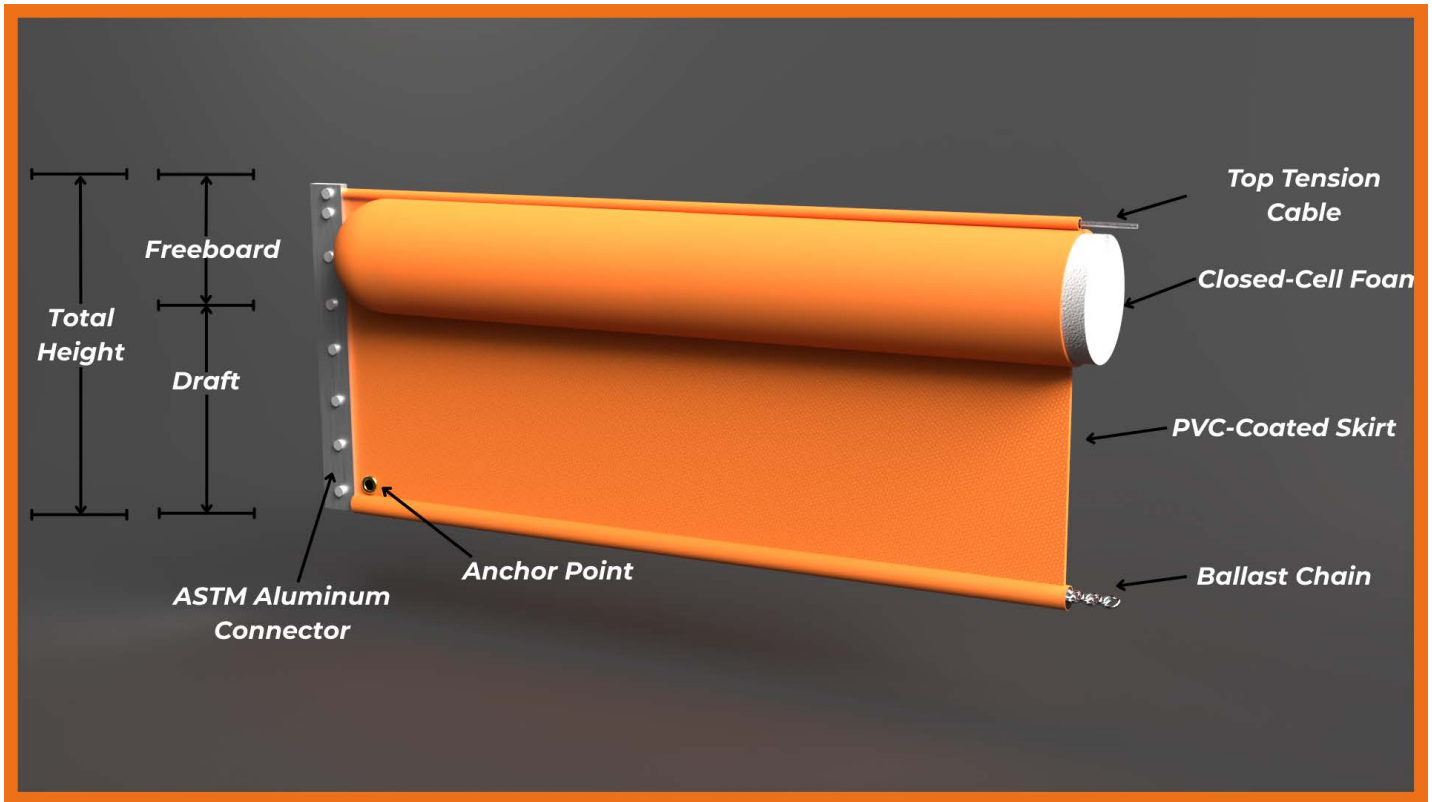

Our specialized Cranberry Corral is specifically designed to create containment ponds within the bogs and making harvesting easier. This is comprised of a 4" round-foam float, and a 4" skirt with a galvanized chain ballast and an optional top tension cable ballast for additional support.

CRANBERRY COLLECTOR:

Designed with collection in mind, this flat-foam styled, sweeping float is built to last and to make your harvesting process smooth. When coupled with our Cranberry Corral, you can create your containment ponds and then use this style to sweep the cranberries to you off the top.

CRANBERRY BOOM

Here is a 3D model of what Cranberry Boom would look similar to if it were to have a rounded float (Cranberry Corral). All details besides the top tension cable are the same for flat foam (Cranberry Collector)
